MEMORANDUM FOR THE RECORD

STAT FROM: [redacted]
STAT Deputy Director of Medical Services

SUBJECT: Medical Support for the DCI

shown to DDCI 8 June 87 [redacted]

1. William Donnelly (DDA) and I met with Judge Webster (DCI) today regarding what medical support he would deem appropriate in his new assignment. It was explained that OMS usually would provide immunization and other preventive support for his travels and emergency medical response should a medical crisis occur at work, and often traveled in the DCI party on extended trips to areas of limited medical care.

2. Judge Webster felt that we should respond to a medical crisis in his case just as we would usually respond. He requested that if he were incapacitated to the point where he could not respond to medical options that if possible we call someone in his family to do this.

3. So far as immunization is concerned, Judge Webster had accepted mandatory immunization while in the Navy, but did not have a record of these. He said he would accept necessary immunizations but would prefer not to take medications (such as malaria prophylaxis). I explained that there were only a few immunizations that would be of value, and when appropriate I would discuss these.

4. Judge Webster did not feel at present that there was a need for a medical person to accompany his travels insofar as his personal health was concerned. If there was a requirement to support the health of others on the trip, he had no objection to a medical person traveling with the staff.

5. The Judge was told that his recent medical evaluation showed him to be in excellent health. It was also suggested that it would be appropriate for us to obtain a blood sample to determine his blood type, as there was no record of this in the present file. He agreed to this, and it has been scheduled for
STAT Monday morning, 8 June. [redacted]
